Buy

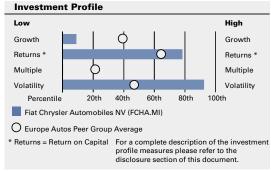

Fiat Chrysler Automobiles NV (FCHA.MI)

Return Potential: 112% Equity Research

Jeep for free; reiterate Buy (CL) with price targets of €25.9/\$30.1

Source of opportunity

We expect FCA to generate €7.5 bn in FCF over the next 18 months, 39% of market cap. Recent comments by CEO Marchionne suggest potential for further value creation from the spin-off of Magneti Marelli, Comau, and eventually Maserati/Alfa Romeo. Today, financial investors could acquire FCA Core (i.e. Jeep/Ram), 80% of group EBIT, essentially for free. This process over the next 18m will not only allow FCA to externalise embedded shareholder value but also to create a more 'digestible' core operation for interested industrial suitors. We reiterate our Buy (on CL) for FCA with new 12m target prices of €25.9/\$30.1, including a 50% SOTP weighting.

Catalyst

We see a number of catalysts driving value creation at FCA: (1) Operational value creation: €7.5 bn FCF over next 18 months (39% of market cap); (2) Structural value creation: spin-off of Magneti Marelli and Comau, and potentially Maserati and Alfa, which we think could be worth €12.0 bn in total; and (3) Potential M&A interest from industry participants for the FCA core business, a NAFTA-centred business with a SUV/Pick-up focus.

Valuation

Our 12m price targets are €25.9/\$30.1 (from €19.2/\$22.4), as we now value FCA using both ROIC and SOTP methods (previously ROIC alone), to reflect current investor attention on FCA's break-up value. Our ROIC-based value remains €19.2 (50% weight), and we introduce a SOTP-based value of €32.6 (50% weight) to arrive at our new price targets. Even after recent performance, FCA trades on 2018E EV/EBITDAP of 1.4x, a significant discount to 6.3x/3.7x at GM/Ford.

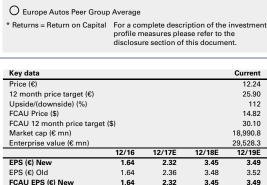

Key risks

Execution risks; US SAAR; US incentives; CO2 compliance cost; sustainability of improved margins; deleveraging slower than we expect; key management transition post 2018; and additional cost headwinds from the potential escalation of FCA's ongoing emissions issues.

Jeep for free; reiterate Buy (CL) with €25.9/\$30.1 price targets

We expect FCA to generate €7.5 bn in FCF over the next 18 months, 39% of market cap. Recent comments by CEO Marchionne suggest potential for further value creation from the spin-off of Magneti Marelli, Comau, and eventually Maserati/Alfa Romeo. Today, financial investors could acquire FCA Core (i.e. Jeep/Ram), 80% of group EBIT, essentially for free. This process over the next 18 months will not only allow FCA to externalise embedded shareholder value but also to create a more 'digestible' core operation for interested industrial suitors. We reiterate our Buy (on Conviction List) recommendation for FCA with new 12m target prices of €25.9/\$30.1, including a 50% SOTP weighting.

CEO Sergio Marchionne is shifting his strategic thinking and public rhetoric towards structural value creation options: On the second quarter earnings call Sergio Marchionne stated: "When we look at the portfolio of activities that FCA carries out, there are things which are associated with automotive but are fundamentally non-OEM activities. And when we have looked at the development of the sector over the last two or three years, we have come to the conclusion that the differences in valuation between what we currently achieve as an OEM and some of the activities that we carry out, including Marelli, no longer justifies aggregation." With the 2014-18 financial plan in full execution mode, Sergio Marchionne is likely to focus on further structural value creation options embedded in FCA's attractive brand portfolio over the next 18 months, in our view.

Recent news reports highlighted Chinese interest in and industrial value of FCA's Jeep brand: FCA shares are up 25% over the past 12 trading days on press reports of Chinese interest in acquiring all or parts of FCA (Bloomberg, August 14). Both FCA and Great Wall Motor issued press releases: FCA (August 21) stated that it "had not been approached by Great Wall Motor in connection with the Jeep brand or any other matter relating to its business." Great Wall Motor (August 22) stated: "The Company has paid attention to and conducted studies on FCA, but there has been no concrete progress so far. There is substantial uncertainty as to whether the Company will proceed with such project, which should not affect the financial results of the Company. Besides, the Company has not built any relationship with the directors of FCA nor has the Company entered into any discussion or signed any agreements with any officer of FCA so far." Despite these statements, we believe that there is a certain industrial logic for Great Wall Motor to consider the addition of FCA's Jeep brand to advance its vision to become a global SUV company. The attractiveness of the Jeep brand was further underlined by comments from former GM Chairman and CEO, Dan Akerson (Bloomberg, August 21): "I would have loved to have been able to buy it when I was at General Motors, if the opportunity had presented itself."

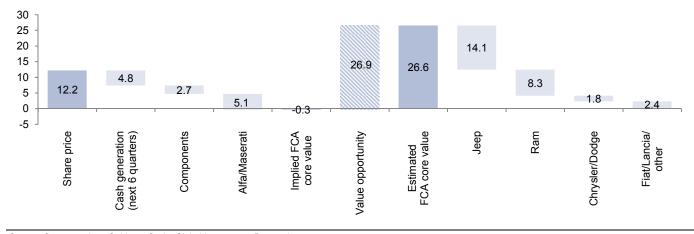

However, we do not believe that a simple disposal of the crown jewel, Jeep, is at the core of Sergio Marchionne's strategic plan: Although recent reports on potential interest from Chinese car makers in Jeep have shifted the focus of both the financial markets and automotive industry participants to the potential financial and strategic value of FCA's Jeep, Ram, Maserati, Alfa, Magneti Marelli and Comau businesses, we do not believe that a disposal of Jeep to a Chinese player would maximise value creation at FCA. On the contrary, we think Sergio Marchionne creates value for shareholders by continuing to spin off non-core automotive assets ('peeling the onion'), possibly even a new premium car group Maserati/Alfa. On the second quarter earnings call Sergio Marchionne stated: "The differences in valuation between what we currently achieve as an OEM and some of the activities that we carry out, including Marelli, no longer justify aggregation... we will show you a much clearer portfolio of OEM activities by the end of 2018."

Today, financial investors could acquire FCA's "crown jewels" essentially for free: Sergio Marchionne has stated on various occasions that he intends to step down as CEO of FCA in 2019, after delivering the 2014-18 financial plan targets. We see €7.5 bn free cash flow generation over the next six guarters, a €4.1 bn special dividend in the form of the

spin-off of Magneti Marelli and Comau, and a potential €7.8 bn special dividend if Maserati/Alfa were to be spun off. At the current share price of €12.2 or €19.0 bn market capitalisation (August 29 close), we calculate based on our SOTP valuation assumptions that financial investors could acquire FCA Core (i.e., Jeep/Ram) for free (with change to spare). In our SOTP valuation, we value FCA Core at €41.3 bn (€26.6 per share).

Exhibit 1: FCA's market cap is less than the value in our SOTP of Alfa, Maserati, Components and next six quarters of cash generation; the valuable FCA core assets come for free

€ per share, priced at close of August 29, 2017

Roadmap for structural shareholder value creation

Based on recent public comments by CEO Marchionne, we believe the following roadmap for substantial shareholder value creation is emerging:

- 1. Isolation of FCA's automotive core assets through components spin-offs: Speaking at the second quarter earnings call Sergio Marchionne stated: "I think that when we speak to you next year in the first half, after having discussed this with the board at some length, it is my view that we will show you a much clearer portfolio of OEM activities by the end of 2018. I think that forms an integral part of the plan going out to 2022." In a first step, we believe FCA could spin off to shareholders the two remaining non-automotive assets at the beginning of 2018: global component supplier Magneti Marelli (€8.1 bn revenues, €515 mn EBIT, 6.4% margin) and worldwide leader in advanced industrial automation solutions Comau (€2.0 bn revenues, €119 mn EBIT, 5.9% margin). In our SOTP valuation, we value Magneti Marelli at €3.2 bn (€2.1 per share) and Comau at €0.8 bn (€0.5 per share).
- 2. Outline of ambitious growth plan for Jeep: Having increased Jeep sales by 5.1x from 0.3 mn units in 2009 to an estimated 1.8 mn units in 2018, FCA's 2022 financial plan is likely to continue to develop Jeep's global presence. On the second quarter earnings call Sergio Marchionne sketched out the long-term potential of the Jeep brand. "If there is one brand out there that has the right to claim the ability to have one out of five, 20% of [the UV market] belong to it, it's Jeep... our prognostication is that this market... is going to be roughly between 33 million and 35 million cars globally. If we're right in the estimation of Jeep need to own 20% of that market, we're talking about over seven million vehicles."

Source: Company data, IHS, Goldman Sachs Global Investment Research.

- 3. Creation of premium Maserati/Alfa group with the new strategic plan: In our view, a core element of FCA's 2022 financial plan is likely to be the creation of a premium group comprising the Maserati and Alfa Romeo brands. At the centre of Maserati's strategy will be an electrification strategy. On the 2Q17 earnings call, Sergio Marchionne shared some of his thinking: "At least one of our brands, and in particular Maserati will go electric over the next model cycle." Marchionne continued to suggest that Maserati will launch electrified models after the next two model launches (GranTurismo and GranCabrio) post 2019, including all-electric models to compete with Tesla. Following this, it would make sense in our view to review the product portfolio and powertrain strategy for Alfa Romeo as well and position the group for electrification too, in a second phase.
- 4. Isolation of FCA Core through a potential spin-off of Maserati/Alfa: "There are no structural, industrial, or engineering restrictions to the separation of Alfa and Maserati". The formation of a Maserati/Alfa group with its own strategy around electrification could be the basis for a decision to spin off the new premium car group with two objectives: (1) it would allow the market to assign an economic value to Maserati/Alfa within an automotive world moving towards electrification and (2) it would make FCA core a less complex and more digestible automotive business, potentially attracting some attention from industrial players.

FCA Core would be a highly profitable and focused on the SUV/Pick-up group: The remaining FCA core would have significant exposure to light trucks, with SUVs and pick-ups making up 59% of 2018 sales (35% Jeep, 14% Ram, and 10% Fiat/Dodge). Jeep/Ram would generate the bulk of earnings in this group in 2018, with the two brands generating a combined 93% of EBIT on our estimates, with 55% of earnings being generated by Jeep and 38% by Ram. NAFTA remains the key region for this group, generating 83% of 2018 EBIT, with only 10% generated in the next largest region of EMEA.

Exhibit 3: FCA Core exposures by brand and region 2018E

^{*} Other primarily Chrysler, Dodge. Fiat, Lancia have small negative EBIT

Source: Company data, IHS, Goldman Sachs Global Investment Research.

FCA Core likely to be more valuable as part of a larger automotive group: On our estimates, FCA Core is likely to be a profitable, self-sustaining automotive asset. However, it could be valued higher by industry participants as a result of the synergy and growth potential embedded in the group. A larger industry player could more rapidly industrialise the growth potential accessible to the Jeep brand (similar to what VW did with Audi) with some significant cost synergies from shared research and development costs as put forward by Sergio Marchionne in his "Confession of a Capital Junkie" presentation in 1Q15.

Roadmap for operational shareholder value creation

Investors remain skeptical of the value of FCA's brand portfolio: Despite the strong share price performance recently (+25% over the past 12 trading days), FCA continues to trade at low comparative multiples compared to its US peers GM and Ford. Exposed to peak US SAAR and with high backward-looking financial leverage, many investors have so far discounted the possibility of FCA delivering on its ambitious 2018 financial targets. We also believe that many investors are 'turned off' by the name FCA (Fiat Chrysler Automotive) – the combination of two (almost) failed car brands.

FCA's 2017 guidance and 2018 targets suggest significant earnings upgrade potential for consensus estimates. Our estimates are 13%/27% above Inquiry Financial consensus estimates for adjusted EBIT in 2017/18. FCA's 2018 targets are at least 18% above consensus. We forecast adjusted EBIT of €7.9 bn (consensus €7.0 bn) and industrial net debt of €2.4 bn (consensus €3.1 bn) for 2017, and adjusted EBIT of €9.4 bn (consensus €7.4 bn) and industrial cash of €3.3 bn (consensus net industrial debt €1.1 bn) in 2018. FCA reported adjusted EBIT of €6.1 bn and net industrial debt of €4.6 bn at the end of financial year 2016. The company guides for 2017 adjusted EBIT of more than €7.0 bn and net industrial debt of less than €2.5 bn as a bridge to its 2018 targets for adjusted EBIT of €8.7-9.8 bn and net industrial cash of €4-5 bn.

We expect FCA to significantly de-lever over the coming two years on the back of an inflection in operating profitability. The cash swing we forecast equates to around half of the company's current market capitalisation. On our estimates, FCA will move from a net debt position of €4.6 bn at end 2016 to a net cash position of €3.3 bn at end 2018. The primary driver of this swing is our expectation of €31 bn in EBITDA over the period. The key cash flow drivers are:

- Adjusted industrial EBITDA: we forecast this to grow from €11.8 bn in 2016 to €16.6 bn in 2018, on a €3.3 bn increase in EBIT and a €1.3 bn increase in D&A.
- Working capital: we forecast a further €1.65 bn cash inflow from working capital through to 2018, driven by a stretching of the working capital schedule (-10.7 days to -14.9 days) and revenue growth of 8% over the period. Note that our working capital assumptions are more conservative than FCA's targeted €3 bn working capital inflow over the same period.
- Financial charges: we forecast net financial charges to reach €1.1 bn pa by 2018, driven by a continued reduction in gross industrial debt, as the ring-fencing of cash from FCA US LLC is now over.
- Capex: we expect R&D and capex to come slightly down relative to revenue, with the absolute capex figures staying stable over our forecast period (€8.1-8.6 bn), similar to FCA's guided capex of €18 bn over 2017/18.

• Taxes: we keep the P&L tax rate at 43% in 2017, and thereafter model a 35% tax rate, in line with FCA's long-term guidance. Note, FCA's cash taxes are meaningfully (8.5 pp) lower than the P&L tax rate through to 2018, owing to the use of deferred tax assets.

NAFTA is the key regional EBIT driver: On our estimates, FCA improves group-adjusted EBIT to €9.4 bn in 2018, an improvement of €3.3 bn vs. 2016. The largest driver of this improvement is FCA's North America (NAFTA) region, accounting for 48% of EBIT improvement over the next two years. In addition, EMEA, LatAm and Maserati contribute almost a further 42% of EBIT improvement.

Source: Goldman Sachs Global Investment Research.

NAFTA profit evolution to be driven by improved price-mix: Our forecast of FCA's NAFTA profit evolution is primarily driven by an improvement in price-mix. We expect FCA to improve EBIT by c.€765 mn in 2017 alone, on the back of improved price-mix, followed by a further €850 mn improvement in 2018. We do not expect this positive price-mix to be dependent on a favourable end-market environment. We assume that US SAAR declines in both 2017 and 2018, as the market moves towards its mid-cycle level of 15 mn from the 2016 peak of 17.6 mn.

NAFTA production realignment is the key price-mix driver: The profit improvement we forecast for FCA's NAFTA region is fundamentally driven by the phasing out of unprofitable car production to be replaced by profitable Jeep- and RAM-branded SUV/truck production. The schematic below illustrates the process in detail. For example, at FCA's Sterling Heights plant (loss-making), Chrysler 200 production has ceased, to be replaced with the new RAM 1500 launch in 2018, which we estimate will generate a contribution margin of 30%. The total gross benefit of the process over 2016-18E could be as much as €2.8 bn, although this is a gross number against which increased fixed costs (notably depreciation) must be netted to come to a realisable EBIT impact.

Exhibit 6: NAFTA realignment could yield a total gross contribution impact of €2.8 bn Change from 2016 to 2018E

Significant rejuvenation of FCA product pipeline 2016-19: FCA is at the start of a product rejuvenation that we estimate, over the coming three years, will reduce the average age of its products to the **lowest since 2002.** FCA's current product line-up has been older than that of GM and Ford since 2007. We estimate the product refresh will lower FCA's average product age to ~3.4 years by 2020 from 6.4 years in 2016. New launches typically impact the financial performance of automotive manufacturers in two key ways:

- Lower incentives: incentives to customers, in the form of cash, additional free content, subsidised loans and leasing terms, tend to increase as a model ages, reducing net realised pricing. The substantial rejuvenation of FCA's product line-up over the coming three years is likely to significantly improve net realised pricing.
- Lower manufacturing costs: the introduction of new models offers a once-in-a-cycle
 opportunity for manufacturers to introduce new, more efficient and less costly
 production processes. The savings typically pay for the increased product content
 offered in new cars, often at similar or only modestly increased base vehicle prices.

FCA NAFTA EBIT margin at 9.4% in 2018: We forecast NAFTA EBIT increasing from €5.1 bn in 2016 to €6.7 bn in 2018, implying a 2018 EBIT margin of 9.4%. This significant increase is driven overwhelmingly by price and mix, as discussed above.

Jeep to drive international growth and profits: The globalisation of the Jeep brand is a core driver in FCA's 2014-18 business plan. FCA targets total Jeep sales volumes of c.2,000k units by 2018, driven by strong performance across all regions and all vehicles. We forecast Jeep sales to increase to 1,761k units by 2018. Assuming an average selling price of €27k, we estimate Jeep revenues reach €39.9 bn in 2018, with an estimated margin of 11% (below light truck margins of GM/F) which generates €4.4 bn of EBIT, c.47% of group EBIT in 2018 based on: (1) An increase in NAFTA production capacity as a result of the production realignment to 1,100k units; (2) an increase in international capacity through localisation of production in EMEA (200k), LatAm (200k) and APAC (500k); (3) an expansion of the product portfolio, with the introduction of B-SUV Renegade and C-UV Compass; (4) the renewal of core Jeep products, such as Wrangler (C-SUV), Grand Cherokee (E-SUV) and Cherokee (C-SUV); and (5) the introduction of add-to-portfolio vehicles, such as Wagoneer (D-SUV), Grand Wagoneer (E-SUV) and Compact Pick-up (C-PUP).

Alfa Romeo a building tailwind to EMEA profitability: Deliveries of Alfa Romeo's Giulia began positively, impacting EMEA volumes and mix in late 2016. However, 2017 will mark a step change for the brand: we forecast a >70% increase in brand sales volumes (from ~70k to 123k) in 2017. This is driven by 1) full Giulia availability and 2) the launch of the Stelvio SUV. Management acknowledges that Alfa's brand volume potential is somewhat of an 'unknown quantity', owing to the lack of predecessor models. We do note that the Giulia and Stelvio, both based on FCA's new rear-wheel drive 'Giorgio' platform, have been well received by the motoring press.

Maserati volume growth to drive margins: Deliveries of the luxury large SUV Levante began positively impacting Maserati's volumes and mix in the second half of 2016. FCA targets total Maserati sales to increase to 75k units per annum in the "medium term", with Levante accounting for half that volume. FCA targets 30k Levantes in 2017; we estimate 25k Levantes in 2017, driving a 40% increase in Maserati's sales to 59k units. Maserati also refreshed the flagship sedan Quattroporte with minor styling tweaks. The powertrain was carried over and active safety features such as adaptive cruise control, lane-departure warning and automated emergency braking were added. The midsize Ghibli will be refreshed and will receive the same technical updates as the Quattroporte in mid-2017, further strengthening Maserati's product portfolio in 2017/18. With Maserati volumes increasing to more than 70k units by 2018, on our estimates, we expect Maserati adjusted EBIT to increase to €850 mn by 2018 from €339 mn in 2016.

Moving to a blended ROIC/SOTP price target

We expect FCA to generate €7.5 bn in FCF over the next 18 months, 39% of market cap. Recent comments by CEO Marchionne suggest potential for further value creation from the spin-off of Magneti Marelli and Comau, and potentially Maserati/Alfa Romeo eventually. Financial investors could then acquire FCA Core (i.e., Jeep/Ram), 80% of group EBIT, essentially for free. The process over the next 18 months will not only allow FCA to externalise embedded shareholder value but also to create a more 'digestible' core operation for interested industrial suitors. We reiterate our Buy (also on CL) recommendation for FCA with new 12m target prices of €25.9/\$30.1, including a 50% SOTP weighting.

New 12m price targets of €25.9/\$30.1

Given the recent market focus on a break-up value and more activity around corporate structure, we now incorporate a SOTP component into our price target, with a 50% weighting.

Exhibit 10: New price target of €25.9 incorporates 50% weighting for our SOTP-value

Valuation	Weight	Price
ROIC-based	50%	19.2
SOTP-based	50%	32.6
Overall valuation	100%	25.9

Source: Goldman Sachs Global Investment Research.

Fundamental value of €19.2

We continue to use our ROIC framework in our valuation method (50% weighting). From this, we derive a fundamental value of €19.2 (unchanged), based on 2018 ROIC of 8.1% and EV/IC:ROIC/WACC of 0.6x.

SOTP valuation of €32.6

We use a SOTP method to estimate the break-up value of Fiat Chrysler, valuing the different brands and divisions primarily using EV/sales multiples based on comparable auto brands/companies. We value Alfa Romeo using a DCF, as it is a brand in the process of being industrialised by FCA. Our SOTP value in 2018 is €32.6.

Significant value relative to US peers

We see significant value vs. US peers of GM and Ford. On a US GAAP basis, FCA trades on 2018E EV/EBITDAP of 1.4x, compared to 6.7x and 4.0x at GM and Ford respectively. On 2018E EV/EBIT, FCA trades on 3.4x, versus 12.2x and 8.3x at GM and Ford.

Risks to our view

- Execution risks: More challenges in executing than expected, for example in the remainder of NAFTA realignment, Alfa Romeo industrialisation, or Maserati electrification.
- US SAAR: Sharper decline than we model, or poorer mix (more cars, fewer trucks).
- **US incentives:** Continued deterioration of the pricing situation in the US car market, at a faster pace and/or greater degree than expected.
- **CO**₂ **compliance cost**: Risk of higher cost than expected owing to tightening standards, more expensive carbon credits.
- Sustainability of improved margins: Whether margins can be sustained even as the NAFTA fleet ages, after its current rapid renewal cycle.
- Deleveraging slower than we expect: One-off costs delaying deleveraging and keeping finance costs higher for longer than we anticipate.
- **Key management transition post 2018**: Lack of suitable replacement to CEO Sergio Marchionne after he retires post 2018.
- Additional cost headwinds from the potential escalation of FCA's ongoing emissions issues: More negative headwinds relating to emissions issues than investors currently expect.

Changes to estimates

We adjust our EBIT slightly downwards (0.8% on average) to reflect continued SAAR softness. However we expect better cash generation as more working capital is released after the NAFTA realignment (we still model less working capital inflow vs. company guidance).

Estimates vs. consensus

Our estimates remain significantly ahead of Inquiry Financial consensus on an EBIT basis (13%/27%/23% over 2017-19) and also EPS (14%/44%/36%); we believe this is because we model significant mix benefits from NAFTA realignment.

Disclosure Appendix

Reg AC

We, Stefan Burgstaller, Demian Flowers, Lucile Leroux, Matthew Chan and Gungun Verma, hereby certify that all of the views expressed in this report accurately reflect our personal views about the subject company or companies and its or their securities. We also certify that no part of our compensation was, is or will be, directly or indirectly, related to the specific recommendations or views expressed in this report.

Unless otherwise stated, the individuals listed on the cover page of this report are analysts in Goldman Sachs' Global Investment Research division.

GS Factor Profile

The Goldman Sachs Factor Profile provides investment context for a stock by comparing key attributes to the market (i.e. our coverage universe) and its sector peers. The four key attributes depicted are: Growth, Financial Returns, Multiple (e.g. valuation) and Integrated (a composite of Growth, Financial Returns and Multiple). Growth, Financial Returns and Multiple are calculated by using normalized ranks for specific metrics for each stock. The normalized ranks for the metrics are then averaged and converted into percentiles for the relevant attribute. The precise calculation of each metric may vary depending on the fiscal year, industry and region, but the standard approach is as follows:

Growth is based on a stock's forward-looking sales growth, EBITDA growth and EPS growth (for financial stocks, only EPS and sales growth), with a higher percentile indicating a higher growth company. **Financial Returns** is based on a stock's forward-looking ROE, ROCE and CROCI (for financial stocks, only ROE), with a higher percentile indicating a company with higher financial returns. **Multiple** is based on a stock's forward-looking P/E, P/B, price/dividend (P/D), EV/EBITDA, EV/FCF and EV/Debt Adjusted Cash Flow (DACF) (for financial stocks, only P/E, P/B and P/D), with a higher percentile indicating a stock trading at a higher multiple. The **Integrated** percentile is calculated as the average of the Growth percentile, Financial Returns percentile and (100% - Multiple percentile).

Financial Returns and Multiple use the Goldman Sachs analyst forecasts at the fiscal year-end at least three quarters in the future. Growth uses inputs for the fiscal year at least seven quarters in the future compared with the year at least three quarters in the future (on a per-share basis for all metrics). For a more detailed description of how we calculate the GS Factor Profile, please contact your GS representative.

Quantum

Quantum is Goldman Sachs' proprietary database providing access to detailed financial statement histories, forecasts and ratios. It can be used for in-depth analysis of a single company, or to make comparisons between companies in different sectors and markets.

GS SUSTAIN

GS SUSTAIN is a global investment strategy aimed at long-term, long-only performance with a low turnover of ideas. The GS SUSTAIN focus list includes leaders our analysis shows to be well positioned to deliver long term outperformance through sustained competitive advantage and superior returns on capital relative to their global industry peers. Leaders are identified based on quantifiable analysis of three aspects of corporate performance: cash return on cash invested, industry positioning and management quality (the effectiveness of companies' management of the environmental, social and governance issues facing their industry).

Disclosures

Coverage group(s) of stocks by primary analyst(s)

Stefan Burgstaller: Europe-Autos & Auto Parts. Lucile Leroux: Europe-Autos & Auto Parts.

Europe-Autos & Auto Parts: Autoliv Inc., BMW, CNH Industrial, CNH Industrial, Continental, Daimler AG, Faurecia, Fiat Chrysler Automobiles NV, Fiat Chrysler Automobiles NV, Hella KGaA Hueck, Michelin, Nokian Renkaat, Peugeot, Porsche, Renault, Schaeffler AG, Valeo, Volkswagen, Volvo.

Company-specific regulatory disclosures

The following disclosures relate to relationships between The Goldman Sachs Group, Inc. (with its affiliates, "Goldman Sachs") and companies covered by the Global Investment Research Division of Goldman Sachs and referred to in this research.

Goldman Sachs beneficially owned 1% or more of common equity (excluding positions managed by affiliates and business units not required to be aggregated under US securities law) as of the month end preceding this report: Fiat Chrysler Automobiles NV (\$14.82)

Goldman Sachs has received compensation for investment banking services in the past 12 months: Fiat Chrysler Automobiles NV (\$14.82)

Goldman Sachs expects to receive or intends to seek compensation for investment banking services in the next 3 months: Fiat Chrysler Automobiles NV (\$14.82)

Goldman Sachs had an investment banking services client relationship during the past 12 months with: Fiat Chrysler Automobiles NV (\$14.82)

Goldman Sachs had a non-securities services client relationship during the past 12 months with: Fiat Chrysler Automobiles NV (\$14.82)

Goldman Sachs makes a market in the securities or derivatives thereof: Fiat Chrysler Automobiles NV (\$14.82)

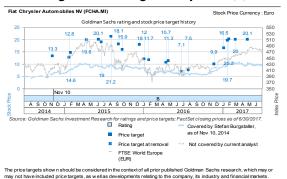

Distribution of ratings/investment banking relationships

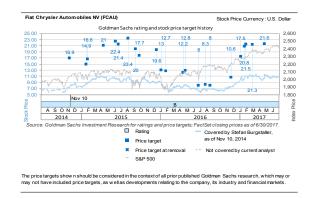

Goldman Sachs Investment Research global Equity coverage universe

	R	Rating Distribution			Investme	tionships	
	Buy	Hold	Sell		Buy	Hold	Sell
Global	32%	54%	14%		65%	56%	49%

As of July 1, 2017, Goldman Sachs Global Investment Research had investment ratings on 2,753 equity securities. Goldman Sachs assigns stocks as Buys and Sells on various regional Investment Lists; stocks not so assigned are deemed Neutral. Such assignments equate to Buy, Hold and Sell for the purposes of the above disclosure required by the FINRA Rules. See 'Ratings, Coverage groups and views and related definitions' below. The Investment Banking Relationships chart reflects the percentage of subject companies within each rating category for whom Goldman Sachs has provided investment banking services within the previous twelve months.

Price target and rating history chart(s)

Regulatory disclosures

Disclosures required by United States laws and regulations

See company-specific regulatory disclosures above for any of the following disclosures required as to companies referred to in this report: manager or co-manager in a pending transaction; 1% or other ownership; compensation for certain services; types of client relationships; managed/co-managed public offerings in prior periods; directorships; for equity securities, market making and/or specialist role. Goldman Sachs trades or may trade as a principal in debt securities (or in related derivatives) of issuers discussed in this report.

The following are additional required disclosures: **Ownership and material conflicts of interest:** Goldman Sachs policy prohibits its analysts, professionals reporting to analysts and members of their households from owning securities of any company in the analyst's area of coverage. **Analyst compensation:** Analysts are paid in part based on the profitability of Goldman Sachs, which includes investment banking revenues. **Analyst as officer or director:** Goldman Sachs policy generally prohibits its analysts, persons reporting to analysts or members of their households from serving as an officer, director or advisor of any company in the analyst's area of coverage. **Non-U.S. Analysts:** Non-U.S. analysts may not be associated persons of Goldman, Sachs & Co. and therefore may not be subject to FINRA Rule 2241 or FINRA Rule 2242 restrictions on communications with subject company, public appearances and trading securities held by the analysts.

Distribution of ratings: See the distribution of ratings disclosure above. **Price chart:** See the price chart, with changes of ratings and price targets in prior periods, above, or, if electronic format or if with respect to multiple companies which are the subject of this report, on the Goldman Sachs website at http://www.gs.com/research/hedge.html.

Additional disclosures required under the laws and regulations of jurisdictions other than the United States

The following disclosures are those required by the jurisdiction indicated, except to the extent already made above pursuant to United States laws and regulations. **Australia**: Goldman Sachs Australia Pty Ltd and its affiliates are not authorised deposit-taking institutions (as that term is defined in the Banking Act 1959 (Cth)) in Australia and do not provide banking services, nor carry on a banking business, in Australia. This research, and any access to it, is intended only for "wholesale clients" within the meaning of the Australian Corporations Act, unless otherwise agreed by Goldman Sachs. In producing research reports, members of the Global Investment Research Division of Goldman Sachs Australia may attend site visits and other meetings hosted by the issuers the subject of its research reports. In some instances the costs of such site visits or meetings may be met in part or in whole by the issuers concerned if Goldman Sachs Australia considers it is appropriate and reasonable in the specific circumstances relating to the site visit or meeting. **Brazil:** Disclosure information in relation to CVM Instruction 483 is available at

http://www.gs.com/worldwide/brazil/area/gir/index.html. Where applicable, the Brazil-registered analyst primarily responsible for the content of this research report, as defined in Article 16 of CVM Instruction 483, is the first author named at the beginning of this report, unless indicated otherwise at the end of the text. Canada: Goldman Sachs Canada Inc. is an affiliate of The Goldman Sachs Group Inc. and therefore is included in the company specific disclosures relating to Goldman Sachs (as defined above). Goldman Sachs Canada Inc. has approved of, and agreed to take responsibility for, this research report in Canada if and to the extent that Goldman Sachs Canada Inc. disseminates this research report to its clients. Hong Kong: Further information on the securities of covered companies referred to in this research may be obtained on request from Goldman Sachs (Asia) L.L.C. India: Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (India) Securities Private Limited, Research Analyst - SEBI Registration Number INH000001493, 951-A, Rational House, Appasaheb Marathe Marg, Prabhadevi, Mumbai 400 025, India, Corporate Identity Number U74140MH2006FTC160634, Phone +91 22 6616 9000, Fax +91 22 6616 9001. Goldman Sachs may beneficially own 1% or more of the securities (as such term is defined in clause 2 (h) the Indian Securities Contracts (Regulation) Act, 1956) of the subject company or companies referred to in this research report. Japan: See below. Korea: Further information on the subject company or companies referred to in this research may be obtained from Goldman Sachs (Asia) L.L.C., Seoul Branch. New Zealand: Goldman Sachs New Zealand Limited and its affiliates are neither "registered banks" nor "deposit takers" (as defined in the Reserve Bank of New Zealand Act 1989) in New Zealand. This research, and any access to it, is intended for "wholesale clients" (as defined in the Financial Advisers Act 2008) unless otherwise agreed by Goldman Sachs. Russia: Research reports distributed in the Russian Federation are not advertising as defined in the Russian legislation, but are information and analysis not having product promotion as their main purpose and do not provide appraisal within the meaning of the Russian legislation on appraisal activity. Singapore: Further information on the covered companies referred to in this research may be obtained from Goldman Sachs (Singapore) Pte. (Company Number: 198602165W). Taiwan: This material is for reference only and must not be reprinted without permission. Investors should carefully consider their own investment risk. Investment results are the responsibility of the individual investor. United Kingdom: Persons who would be categorized as retail clients in the United Kingdom, as such term is defined in the rules of the Financial Conduct Authority, should read this research in conjunction with prior Goldman Sachs research on the covered companies referred to herein and should refer to the risk warnings that have been sent to them by Goldman Sachs International. A copy of these risks warnings, and a glossary of certain financial terms used in this report, are available from Goldman Sachs International on request.

European Union: Disclosure information in relation to Article 4 (1) (d) and Article 6 (2) of the European Commission Directive 2003/125/EC is available at http://www.gs.com/disclosures/europeanpolicy.html which states the European Policy for Managing Conflicts of Interest in Connection with Investment Research.

Japan: Goldman Sachs Japan Co., Ltd. is a Financial Instrument Dealer registered with the Kanto Financial Bureau under registration number Kinsho 69, and a member of Japan Securities Dealers Association, Financial Futures Association of Japan and Type II Financial Instruments Firms Association. Sales and purchase of equities are subject to commission pre-determined with clients plus consumption tax. See company-specific

disclosures as to any applicable disclosures required by Japanese stock exchanges, the Japanese Securities Dealers Association or the Japanese Securities Finance Company.

Ratings, coverage groups and views and related definitions

Buy (B), Neutral (N), Sell (S) -Analysts recommend stocks as Buys or Sells for inclusion on various regional Investment Lists. Being assigned a Buy or Sell on an Investment List is determined by a stock's total return potential relative to its coverage. Any stock not assigned as a Buy or a Sell on an Investment List with an active rating (i.e., a stock that is not Rating Suspended, Not Rated, Coverage Suspended or Not Covered), is deemed Neutral. Each regional Investment Review Committee manages various regional Investment Lists to a global guideline of 25%-35% of stocks as Buy and 10%-15% of stocks as Sell; however, the distribution of Buys and Sells in any particular analyst's coverage group may vary as determined by the regional Investment Review Committee. Additionally, each Investment Review Committee manages Regional Conviction lists, which represent investment recommendations focused on the size of the total return potential and/or the likelihood of the realization of the return across their respective areas of coverage. The addition or removal of stocks from such Conviction lists do not represent a change in the analysts' investment rating for such stocks.

Total return potential represents the upside or downside differential between the current share price and the price target, including all paid or anticipated dividends, expected during the time horizon associated with the price target. Price targets are required for all covered stocks. The total return potential, price target and associated time horizon are stated in each report adding or reiterating an Investment List membership.

Coverage groups and views: A list of all stocks in each coverage group is available by primary analyst, stock and coverage group at http://www.gs.com/research/hedge.html. The analyst assigns one of the following coverage views which represents the analyst's investment outlook on the coverage group relative to the group's historical fundamentals and/or valuation. Attractive (A). The investment outlook over the following 12 months is favorable relative to the coverage group's historical fundamentals and/or valuation. Neutral (N). The investment outlook over the following 12 months is neutral relative to the coverage group's historical fundamentals and/or valuation. Cautious (C). The investment outlook over the following 12 months is unfavorable relative to the coverage group's historical fundamentals and/or valuation.

Not Rated (NR). The investment rating and target price have been removed pursuant to Goldman Sachs policy when Goldman Sachs is acting in an advisory capacity in a merger or strategic transaction involving this company and in certain other circumstances. Rating Suspended (RS). Goldman Sachs Research has suspended the investment rating and price target for this stock, because there is not a sufficient fundamental basis for determining, or there are legal, regulatory or policy constraints around publishing, an investment rating or target. The previous investment rating and price target, if any, are no longer in effect for this stock and should not be relied upon. Coverage Suspended (CS). Goldman Sachs has suspended coverage of this company. Not Covered (NC). Goldman Sachs does not cover this company. Not Available or Not Applicable (NA). The information is not available for display or is not applicable. Not Meaningful (NM). The information is not meaningful and is therefore excluded.

Global product; distributing entities

The Global Investment Research Division of Goldman Sachs produces and distributes research products for clients of Goldman Sachs on a global basis. Analysts based in Goldman Sachs offices around the world produce equity research on industries and companies, and research on macroeconomics, currencies, commodities and portfolio strategy. This research is disseminated in Australia by Goldman Sachs Australia Pty Ltd (ABN 21 006 797 897); in Brazil by Goldman Sachs do Brasil Corretora de Títulos e Valores Mobiliários S.A.; in Canada by either Goldman Sachs Canada Inc. or Goldman, Sachs & Co.; in Hong Kong by Goldman Sachs (Asia) L.L.C.; in India by Goldman Sachs (India) Securities Private Ltd.; in Japan by Goldman Sachs Japan Co., Ltd.; in the Republic of Korea by Goldman Sachs (Asia) L.L.C., Seoul Branch; in New Zealand by Goldman Sachs New Zealand Limited; in Russia by OOO Goldman Sachs; in Singapore by Goldman Sachs (Singapore) Pte. (Company Number: 198602165W); and in the United States of America by Goldman, Sachs & Co. Goldman Sachs International has approved this research in connection with its distribution in the United Kingdom and European Union.

European Union: Goldman Sachs International authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority, has approved this research in connection with its distribution in the European Union and United Kingdom; Goldman Sachs AG and Goldman Sachs International Zweigniederlassung Frankfurt, regulated by the Bundesanstalt für Finanzdienstleistungsaufsicht, may also distribute research in Germany.

General disclosures

This research is for our clients only. Other than disclosures relating to Goldman Sachs, this research is based on current public information that we consider reliable, but we do not represent it is accurate or complete, and it should not be relied on as such. The information, opinions, estimates and forecasts contained herein are as of the date hereof and are subject to change without prior notification. We seek to update our research as appropriate, but various regulations may prevent us from doing so. Other than certain industry reports published on a periodic basis, the large majority of reports are published at irregular intervals as appropriate in the analyst's judgment.

Goldman Sachs conducts a global full-service, integrated investment banking, investment management, and brokerage business. We have investment banking and other business relationships with a substantial percentage of the companies covered by our Global Investment Research Division. Goldman, Sachs & Co., the United States broker dealer, is a member of SIPC (http://www.sipc.org).

Our salespeople, traders, and other professionals may provide oral or written market commentary or trading strategies to our clients and principal trading desks that reflect opinions that are contrary to the opinions expressed in this research. Our asset management area, principal trading desks and investing businesses may make investment decisions that are inconsistent with the recommendations or views expressed in this research.

The analysts named in this report may have from time to time discussed with our clients, including Goldman Sachs salespersons and traders, or may discuss in this report, trading strategies that reference catalysts or events that may have a near-term impact on the market price of the equity securities discussed in this report, which impact may be directionally counter to the analyst's published price target expectations for such stocks. Any such trading strategies are distinct from and do not affect the analyst's fundamental equity rating for such stocks, which rating reflects a stock's return potential relative to its coverage group as described herein.

We and our affiliates, officers, directors, and employees, excluding equity and credit analysts, will from time to time have long or short positions in, act as principal in, and buy or sell, the securities or derivatives, if any, referred to in this research.

The views attributed to third party presenters at Goldman Sachs arranged conferences, including individuals from other parts of Goldman Sachs, do not necessarily reflect those of Global Investment Research and are not an official view of Goldman Sachs.

Any third party referenced herein, including any salespeople, traders and other professionals or members of their household, may have positions in the products mentioned that are inconsistent with the views expressed by analysts named in this report.

This research is not an offer to sell or the solicitation of an offer to buy any security in any jurisdiction where such an offer or solicitation would be illegal. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should consider whether any advice or recommendation in this research is suitable for their particular circumstances and, if appropriate, seek professional advice, including tax advice. The price and value of investments referred to in this research and the income from them may fluctuate. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. Fluctuations in exchange rates could have adverse effects on the value or price of, or income derived from, certain investments.

Certain transactions, including those involving futures, options, and other derivatives, give rise to substantial risk and are not suitable for all investors. Investors should review current options disclosure documents which are available from Goldman Sachs sales representatives or at http://www.theocc.com/about/publications/character-risks.jsp. Transaction costs may be significant in option strategies calling for multiple purchase and sales of options such as spreads. Supporting documentation will be supplied upon request.

All research reports are disseminated and available to all clients simultaneously through electronic publication to our internal client websites. Not all research content is redistributed to our clients or available to third-party aggregators, nor is Goldman Sachs responsible for the redistribution of our research by third party aggregators. For research, models or other data available on a particular security, please contact your sales representative or go to http://360.gs.com.

Disclosure information is also available at http://www.gs.com/research/hedge.html or from Research Compliance, 200 West Street, New York, NY 10282.
